The solution

SAIS Technology.S2S – a platform for distributed learning

Awareness

- Alumni career guide
- Company profiles
- Blog on DC tech-policy events
- Weekly newsletter

Adaption

- AI policy workshop with applications in Python
- Academic and professional events and conferences

Advancement

- Research opportunities
- Assistance in job search
- ...
- ...

- **Goal:** Incubate policy students through Awareness-Adaption-Advancement into technology-adapted leaders

- **Goal:** Contribute to DC's discussions on tech-policy through a focused and forward-thinking content strategy

The strategy

- **Mission**: We seek close collaboration with leaders in business and academia to advance tech-policy learning

- **Our inquiry:**
  - Partner with an advisor to navigate the AI landscape
  - Align with a forward-thinking mission
  - Receive critical feedback on our growth and operations

- **Our timeline:**
  - Website launch (SEP2018)
  - 10 session workshop start (SEP2018)
  - Goal: 200+ members (OCT2018)
  - learnAI conference (NOV2018)

- **Our offer:**
  - Impact students at a leading policy school learning about AI
  - Delegate tasks to a highly skilled post-grad student body
  - Leverage the geopolitical understanding of SAIS students
  - Advance your mission through our work in DC
